

# Physics 160 Written Homework - Chapter 4

## Solutions

(a) Tractor

$$(b) \quad V^2 - V_0^2 = 2a\Delta x = 2a(x - x_0)$$

$$V_0 = 80 \text{ mph} = 128 \text{ km/h} = 35.56 \text{ metres per second}$$

$$a = \frac{-V_0^2}{2\Delta x} = \frac{-(35.56)^2}{2 \times 0.1}$$

$$\left. \begin{array}{l} V = 0 \\ x = 0.1 \text{ m} \\ x_0 = 0 \end{array} \right\} \Delta x = 0.1 \text{ m}$$

$$a = -6322.57 \text{ m/s}^2$$

$$(c) \quad \sum F_i = ma \Rightarrow F_a = ma$$

$$m = 95,000 \text{ Lbs} \times 0.453 \text{ kg}$$

$$m = 43091.28 \text{ kg}$$

$$F = 43091.28 \times (-6322.57)$$

$$= -27247634.19 \text{ N} \approx 2.72 \times 10^7 \text{ N}$$

2,

Free body diagrams

(b) On the Free body diagrams one 3<sup>rd</sup> law pairs can be found they are  $F_{N C \rightarrow P}$  (normal force car acts on man) &  $F_{N P \rightarrow C}$  (normal force man acts on car)

Other forces

$F_{g E \rightarrow P}$  : Force Earth acts on Person due to gravity  
Its 3<sup>rd</sup> law pair is acted by Person on Earth

$F_{N T \rightarrow C}$  : Normal force that Track acts on car.  
Its 3<sup>rd</sup> law pair is the force that car acts on track

$F_{g E \rightarrow C}$  : Force Earth acts on car due to gravity  
Its 3<sup>rd</sup> law pair is acted by car on Earth.
